Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or render obvious the claimed combination including an exhaust gas system comprising an Active Lean NOx catalyst (ALNC); and a selective catalytic reduction (SCR) catalyst coupled downstream of said oxidation catalyst.

The examiner has considered that the Active Lean NOx catalyst (ALNC) and the conventional NOx catalyst **do not technically perform the same function as well known by those with ordinary skill in the art.**

In addition, applicant's arguments, filed May 09, 2005, and September 27, 2005 with respect to Claims 1, and 9 have been fully considered and are persuasive. Accordingly, the Office Action mailed on July 26, 2005 has been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
